## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 45-56 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on May 21, 2004.

This application contains claims 45-56 drawn to an invention nonelected with traverse in Paper No. (May 21, 2004). A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2873

Claims 57-64 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 29-52 of U.S. Patent No. 6,361,166. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the application are drawn to spectacles that include a frame as well as lens elements recited in claims 29-52 of the '166 patent. It would have been obvious to one of ordinary skill in the art to include a spectacle frame and a pair of ophthalmic lenses with front and back surfaces having a correction that at least partially adjusts for errors that include astigmatic errors, since lenses utilized in ophthalmic correction are mounted in a frame for use as a matter of course.
